## Interop Event Status
**Feb/March Interop GA Event**
1) Updated Logo List now available: https://www.iol.unh.edu/services/testing/ofa/interoplist/2013-01/

**May Interop GA Event -** Status update from UNH-IOL
1) InfiniBand testing is almost done – just a few more tests to run and then some final validation testing.
2) iWARP noting has changed with the vendor firmware or OFED since last October so there will be no change in status for iWARP products.
3) RoCE testing - Nate
   a) All testing has been completed and everything has gone as expected. He has talked with vendors and they know status.
   b) Logo report will be sent to vendors with a two week timer. After two weeks, if vendor finds no fault, then they will publish.
   c) Edward will send out a reminder before publishing.
   d) They will begin work on the reports by the end of next week or early the following week.

## Open Discussion
1) IBM will work with us on bonding and IPv6
2) Edward and Nate will test OFED 3.5.2
3) October Debug Event
4) **Jeff** noted that Mandatory items in the test plan should be reviewed and will need updating for the next event. Some items should not be marked mandatory any more. For example page 24 shows mandatory for iSER, NFSoRDMA and RSockets.
