## January 2014 Logo Event update - Edward

- 1) UNH-IOL is working on a new revision 1.1 which is maintaining semantics and but will actually improve the perception of the results. Not all vendors will receive updated reports but will be issued as needed.
- 2) We are also considering developing OFED overview reports which will not focus so much on individual vendor products but rather the overall state of the OFED Built that was tested. So it will include known bugs, workarounds FAQs, Kernels and OS supported and those not supported. It may also contain information about protocols that are no longer included or tested such as SDP, RDP and iSER. The reason for developing this report is to provide end users and the RDMA community more of the knowledge we can while doing interoperability testing without breaching any vendor confidentiality. This will add value for the OFILG members and the OFA at large.
- 3) **Arbitration – deadline – 2 weeks from release of reports.**
  - a) You have two weeks from date of the receipt of the reports to submit an arbitration claim along with the technical analysis of why you feel the claim has merits.
  - b) The Arbitration Committee will make every attempt to resolve the claim within two weeks.
  - c) There will be no exceptions to this deadline!
- 4) **Publication on the Logo List**
  - a) Explicit written approval from the vendor must be received before UNH-IOL is allowed to publish the reports on the public website.

## Action Requests (ARs)
